## MX SERIES

Wharfedale's MX Series high-performance passive loudspeakers complement portable and high-end club system applications. Available in single, dual-woofer, and subwoofer configurations, the MX Series delivers extreme accuracy at high sound pressure levels, while retaining a very natural sound.

Incorporating advanced high-efficiency Wharfedale Pro drivers matched with precision crossovers, the MX Series provide a smart and affordable upgrade to existing club and rental installations.

### FEATURES

Custom high-efficiency Wharfedale Pro full-range drivers

50mm titanium compression driver with Conical Waveguide Technology

Sophisticated crossover design enables smooth power and frequency response

Protective steel grille with reflective plating

Pole-mount socket (MX-112, MX-115, MX18B, MXF18B) MXF18B features four casters for easy roll in and set up

Pro-Tech integrated High-Frequency Driver Overload Protection

Full-range / biamp switch and Speakon™ connectors

## MX SERIES TWO-WAY LOUDSPEAKERS

All MX Series two-way loudspeaker enclosures are trapezoidal shaped, with M-10 rigging points for easy array setups. Constructed using 18mm birch plywood, the MX Series is meticulously designed for superior acoustics and durability. The integrated carrying handles make for easy transport. Hookup is simple too, with integrated industry-standard Speakon™ connectors.

The MX Series feature high-efficiency full-range drivers custom manufactured in Wharfedale's own factory. Cast frames and oversize LF voice coils mean sustained high-power output capacity and minimal power compression. Conical Waveguide Technology, coupled with a 50mm titanium compression driver provide a dispersion pattern of 75° x 75°, allowing for even coverage—especially in the crucial vocal ranges.

## MX SERIES SUBWOOFERS

Wharfedale's MX Series Passive Subwoofers are ideal for adding massive low-end to the MX Series two-way loudspeakers—or any existing sound system in need of extended low frequency response. All MX Series subwoofers feature proprietary 18" Wharfedale Pro drivers, and 13-ply birch construction. With convenient carry handles and pole mount sockets, rugged design, and durability, MX Series subwoofers can survive the punishment of professional installs—as well as life on the road.
